NSNFP National Spent Nuclear Fuel Program	REVIEW AND APPROVAL OF NSNFP INTERNAL DOCUMENTS	Doc. No.: PMP 6.01 Revision: 10 Eff. Date: 08/13/2004 Page: 1 of 9 DAR No.: NSNF-533

Approval: M.D. Gardner _____ Date: 8/12/04
Manager, National Spent Nuclear Fuel Program

I. PURPOSE AND SCOPE

This procedure establishes the process used by the National Spent Nuclear Fuel Program (NSNFP) for conducting internal reviews of and obtaining approvals of *internal documents* (see glossary). The process applies to internal documents to be distributed by NSNFP Document Control.

II. SUMMARY

The NSNFP Program Support Organization (PSO) provides the infrastructure necessary to support the review and approval process for documents generated by the NSNFP. Attachment A of this procedure designates the minimum review and approval authority for NSNFP internal documents. The attachment provides a cross-reference to individual NSNFP procedures containing development and review criteria for each document type listed. On a case-by-case basis, the Manager NSNFP, approves review criteria for internal documents not listed in Attachment A, This procedure describes the process for releasing an NSNFP draft document for internal review, comment resolution, and approval. The process interfaces with the corrective action process if technical errors are discovered in previously approved NSNFP engineering documents and the training system to ensure document preparers and mandatory reviewers are currently trained. The procedure segregates internal document types into two groups to facilitate proficiency training needs determinations. Controls are included to update the NSNFP Quality Assurance Requirements and Description (QARD) Requirements Matrix, as applicable, when internal quality assurance program implementing documents are created or changed. A Document Action Request (DAR) form is used in conjunction with this procedure to record completion of various stages of the document review process and integrate the process with proficiency training and document distribution.
